

Proper Banner Care

HANGING

Hang your new banner properly so that the banner will not droop in the center. Do not stretch the material excessively. We recommend utilizing all grommet holes. If hanging on a fence or between poles, use bungee cords to absorb wind resistance.

CLEANING

Clean with water, mild detergent and dry thoroughly.

TRANSPORTING AND STORING

DO NOT FOLD! DO NOT USE RUBBER BANDS!

Always **ROLL** the banner. If there is cut vinyl graphics, be sure to roll the banner with the graphics on the outside to keep it shape. Folding the banner or using rubberbands will cause permanent wrinkles and the banner will lose it's shape very quickly.

Store the banner in a cool area, standing upright. Laying the banner down will cause folds and wrinkles, and the vinyl lettering will stretch and bubble.
